SKILLED in short...

The project SKILLED-“Sustainable Skills for Local Developer”- is an innovative European project aiming at creating the professional figure of the EESLD, European Expert in Sustainable Local Development, able to design innovative territorial development plans, interfacing with technical as well as policy level actors.

The project also intends to create a transnational skills validation method to promote transparent validation tools in the EU by supporting flexibility. Further, the SKILLED project attempts to formalize non-formal and informal competences that acquired by more experienced persons to transfer them in the training programmes addressed to young VET.

SKILLED last Transnational Partners Meetings...

The **fourth transnational partner meeting** took place on the 28th and 29th of April 2022 in Karditsa, GREECE. The partners agreed on how to finalize the Transnational Skills Validation methodology in order to show the final design during the next transnational partner meeting.

The partners will validate mentors competences and will identify gaps eventually existing, during May 2022, so the validation model will be assessed through the testing phase involving mentors.

Regarding the case study methodology, all partners will analyze the methodology used for the case studies implemented with the students during or after the piloting course.

The **fifth transnational partner meeting** took place on the 22nd and 23rd of June 2022 in Bucharest, ROMANIA. The partners finalized the implementation of the “Transnational Skills Validation methodology” and checked the results of the piloting with mentors and the second Multiplier Event of the project held on the 17th of May in Bucharest, ROMANIA.

What is next on SKILLED...

The partners will be involved in the dissemination of all the materials obtained during the implementation of the project and FPT will carry out the final multiplier event (in Spain). All partners will also contribute to the planning of the final report to be submitted at the end of the project.

The project has started on September 1st 2019 and will progress till August 31st 2022.
